

MUHAMMAD BASITH K

Software Engineer — Python Full Stack Developer

+91-9048884058 | basithkdrbk@gmail.com | GitHub | LinkedIn | HackerRank | Portfolio

Professional Summary

Software Engineer specializing in Python full-stack development using Django, Django REST Framework, React.js, Next.js, and PostgreSQL. Shipped multiple full-stack platforms spanning **90+ REST API endpoints** and **20+ database models**, with hands-on experience in authentication, authorization, API design, database workflows, deployment, debugging, and production troubleshooting. Diagnosed and resolved Unicorn worker timeouts and ORM/API serialization issues while contributing **25+ merged PRs** across 12 Agile sprint cycles.

Technical Skills

Languages: Python, JavaScript, TypeScript, C++, SQL **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Django, Django REST Framework, REST APIs, JWT Authentication, ORM, CRUD **Databases:** PostgreSQL, MySQL

Engineering: OOP, DSA, MVC Architecture, Authentication & Authorization, Role-Based Access Control, Debugging, Testing, Agile/Scrum

Tools: Git, GitHub, Postman, Vercel, Render, Unicorn, Cloudinary

Experience

Python Full Stack Developer Intern (Hybrid)

April 2026 – September 2026

Gen Corpus Data Hub, Kozhikode, Kerala

- Engineered and shipped **15 full-stack features** using Python, Django, Django REST Framework, React.js, and PostgreSQL, developing **24 RESTful API endpoints** and resolving **43 bugs**.
- Developed responsive interfaces across **9 React.js modules** and implemented authentication, authorization, CRUD workflows, and database-backed functionality.
- Contributed **25 merged pull requests** across **12 Agile sprint cycles**, debugging issues across frontend, backend, API, and database layers.

Professional Projects

JobSphere – Career & Recruitment Platform

Repo | Live

React.js, Django REST Framework, PostgreSQL, JWT, Cloudinary

- Built a full-stack recruitment platform with Candidate/Recruiter workflows, JWT authentication, role-based authorization, job posting, applications, and resume management.
- Implemented **28 REST API endpoints** with approximately **38ms average response time** and integrated Cloudinary for external media storage.

TripPilot – Travel Planning Platform

Repo | Live

Next.js, TypeScript, Django REST Framework, PostgreSQL, JWT

- Architected a full-stack platform spanning **20 database models** and **40+ REST API endpoints** for authentication, trip management, itinerary generation, and layover planning.
- Diagnosed and resolved a production outage caused by Unicorn worker timeouts during long-running requests and fixed ORM-to-API serialization issues across backend services.

PrepPilot – Placement Preparation Platform

Repo | Live

React.js, Django, Django REST Framework, PostgreSQL, JWT

- Built a full-stack placement platform with JWT authentication, REST APIs, role-based workflows, and responsive React dashboards.
- Designed **10 custom database models** supporting study planning, placement tracking, mock interviews, scheduling, and user profiles.

Happy Hearts – Client Production Website

Live Website

React.js, Django, Django REST Framework, PostgreSQL, JWT

- Developed a production management platform for a child care and therapy centre with role-based workflows for administrators, receptionists, therapists, families, and children.
- Implemented responsive interfaces and REST API workflows covering **children, families, appointments, therapist schedules, assessments, therapy sessions, progress tracking, billing, and reports**.

WOODWILL – Client Production Website

Live Website

React.js, Vite, JavaScript, Tailwind CSS, Vercel

- Designed and developed a production website for a premium home, furniture, and interiors brand with responsive, component-driven React interfaces and polished project presentation.
- Implemented responsive layouts and deployed the production website through Vercel with a custom domain.

Education

SRM Institute of Science and Technology, Chennai, India

Aug 2022 – May 2026

B.Tech in Computer Science and Engineering

CGPA: 7.63/10.0

Certifications

Full Stack Open – University of Helsinki (5 ECTS, Grade 5) | AWS Academy – Machine Learning Foundations | Python Programming – Iskima (90%) | Oracle – Certified Foundations Associate | Cisco – Networking Essentials

Achievements

- Earned HackerRank 5-star badges in C, C++, and Java, plus the Problem Solving badge.
- Led a three-member technical team through project development, debugging, and delivery.
