

MUHAMMAD BASITH K

Software Engineer — Python Full Stack Developer

+91-9048884058 | basithkdrbk@gmail.com | GitHub | LinkedIn | HackerRank | Portfolio

Professional Summary

Python Full Stack Developer specializing in Django/DRF, React.js and Next.js, with hands-on experience integrating LLMs (Google Gemini) into production workflows – AI-driven itinerary generation, resume analysis, and interview prep. Shipped 4 full-stack platforms spanning 90+ REST API endpoints, diagnosed and resolved live production incidents (Gunicorn worker timeouts, ORM serialization failures), and delivered 25+ merged PRs across 12 Agile sprint cycles.

Technical Skills

Languages: Python, JavaScript (ES6+), C++, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap 5, Tailwind CSS
Backend: Django, Django REST Framework, REST APIs, JWT Authentication
Databases: PostgreSQL, MySQL
Tools: Git, GitHub, Postman, VS Code, Vercel, Render
Core Concepts: OOP, DSA, MVC Architecture, CRUD, API Integration, Responsive Design

Experience

Python Full Stack Developer Intern (Hybrid) Jan 2026 – July 2026
Gen Corpus Data Hub, Kozhikode, Kerala

- Engineered and shipped 15 full-stack features end-to-end using Python, Django, DRF, React.js, and PostgreSQL, developing 24 RESTful API endpoints and fixing 43 bugs across the codebase.
- Owned responsive UI development across 9 modules in React.js and secure authentication/CRUD workflows in Django; merged 25 pull requests over 12 Agile sprint cycles, partnering with senior engineers to ship production-ready code on schedule.

Professional Projects

JobSphere – AI-Powered Career & Recruitment Platform Repo | Live Demo
React.js, Django REST Framework, PostgreSQL, JWT, Cloudinary, Vercel, Render

- Built a full-stack recruitment platform with 2 user roles (Candidate, Recruiter), secure JWT authentication, and role-based authorization, driven by 97+ commits.
- Integrated 28 RESTful API endpoints averaging 38ms response time with a responsive React frontend covering job posting, search, application tracking, and resume uploads via Cloudinary.
- Designed and shipped an AI Career Hub with 4 LLM-powered tools – ATS resume analysis, AI resume feedback, cover letter generation, and mock interview assistance – handling prompt construction and API response parsing end-to-end; deployed on Vercel/Render with Neon PostgreSQL.

TripPilot – AI Travel Planning Platform Repo | Live Demo
Next.js, TypeScript, Django REST Framework, PostgreSQL, Google Gemini, Cloudinary, JWT, Vercel, Render

- Architected a full-stack AI travel platform spanning **20 database models** and **40+ REST API endpoints**, with JWT auth, itinerary generation, trip management, and layover-planning workflow.
- Integrated Google Gemini for personalized, budget-constrained itineraries in real time, pairing AI-proposed flights with a rule-based route-matching engine and fallback logic for 100% generation success.
- Diagnosed and resolved a production outage from Gunicorn worker timeouts during long-running AI calls; built a Cloudinary-backed media pipeline, resolving ORM-to-API serialization edge cases.

PrepPilot – Placement Preparation Platform Repo | Live Demo
React.js, Django, Django REST Framework, PostgreSQL, JWT

- Built a full-stack placement preparation platform using React, Django, DRF, PostgreSQL, and Simple JWT authentication.
- Designed 10 custom database models supporting study planning, placement tracking, mock interviews, calendar scheduling, and user profiles.
- Developed RESTful APIs, role-based dashboards, and company-specific mock interview generation; deployed on Render.

City Hospital Management System Repo | Live Demo
Python, Django, PostgreSQL, Bootstrap, Render, Gunicorn

- Built a role-based Hospital Management System supporting 3 user roles (Administrator, Doctor, Patient) with 5 custom database models covering appointments, department, and medical reports.
- Developed responsive dashboards, appointment workflows, and automated email notifications; deployed with Gunicorn and WhiteNoise for production-ready static/media handling.

Education

SRM Institute of Science and Technology, Chennai, India Aug 2022 – May 2026
B.Tech in Computer Science and Engineering CGPA: 7.63/10.0
Final semester (8th) was fully project-based, enabling a concurrent hybrid industry internship.

Certifications

Full Stack Open – University of Helsinki (5 ECTS, Grade 5) | AWS Academy – Machine Learning Foundations | Python Programming (Iskima, 90%) | Oracle – Certified Foundations Associate | Cisco – Networking Essentials

Leadership & Achievements

- Led a three-member team in developing the Uncertainty-Aware SegFormer research project for satellite imagery segmentation.
- Earned HackerRank 5-star badges in C, C++, and Java, plus the Problem Solving badge.
